## Lighting Control Solutions

Are your lighting controls working at peak performance OR not working at ALL?

Gamma Lighting Controls can fit nicely into existing lighting control cabinets, while utilizing existing relays and wire.

***"Retrofits are a Breeze!"***

Don't abandon your lighting control system due to obsolete parts, only to be to be operated by yard timers!

### ***Enhanced Lighting Performance***

ENERGY STAR® reports that lighting alone accounts for about 35% of a commercial building's electricity use, making it one of the most significant costs for your facility.

That's why Gamma is designed to enhance lighting performance and occupant comfort while reducing energy expenses.
